UW Technology
Data Costs and Benefits for off-campus locations
rev. 06/15/10

Service	Non-recurring Installation Costs	Monthly Costs	Notes
Connection to the UW Campus Network from off-campus locations	$146 per ethernet connection,* plus provisioning costs - see below	See services below	

UW Network Provisioning Options	Non-recurring Installation Costs	Monthly Costs	Notes
T-1s (1500K, approx. 1.5 Mbps per T-1)	$500 per T-1	$300-$400 per T-1 depending on location and length of lease	
Qwest Metro Optical Ethernet (QMOE) (50 Mbps - 100 Mbps)	$500*	$1,331/month (50 Mbps), $2,242/month (100 Mbps)	Not available in all areas, *may require infrastructure, cabling work at additional cost, requires 4-year contract, implementation takes 60-90 days from date of order
UW Metro Area Fiber (1000 Mbps)	Can average from $30,000 and higher depending on location	$790/month	New fiber implementation typically takes 6 months from date of order
For more specific estimates or other options, please contact UW Technology (help@uw.edu).			

UW Data Network Benefits	http://www.washington.edu/itconnect/connecting/
24-hour Monitoring	UW Technology provides 24-hour monitoring on UW network devices and provides repairs and maintenance to routers, switches, UPS's and other UW Technology-provided equipment.
UW Information Technology Network Operations Center (**UW-IT NOC**) and the UW Information Technology Service Center (**UW-IT Service Center**)	These service centers provide a wide range of expertise and services to support UW data networks on and off campus.
Security	http://www.washington.edu/itconnect/security/ Several mechanisms are provided to assist departments in protecting their computers and information resources.
Nebula Services	http://www.washington.edu/itconnect/wares/nebula/ http://www.washington.edu/itconnect/wares/nebula/services.html Access to Nebula services (a system of networked personal computers, centrally managed and supported).
Campus Wifi	http://www.washington.edu/itconnect/connecting/wireless/ Campus wifi services can be installed at an additional charge (determined by the size of the wifi coverage area and infrastructure work
Access to UW Resources	Having a UW data network ensures access to all UW resources including those with special HIPPA requirements.
Consistent Upload/Download speeds	UW Technology offers data speeds that are the same for inbound as well as outbound traffic.

* Infrastructure and connectivity back to campus is not included in this rate.
