

CONNECT TO A DATA CUBE

Teleworking? First connect to the UW Network with a VPN, such as Husky OnNet

To access and use a cube, first open Microsoft Excel on your computer and start a new blank workbook.

Note: You are not limited to only Excel. You can follow similar steps using Tableau.

1 OPEN

- Select the **"Data"** tab at the top
- Select **"From Other Sources"**
- Select **"From Analysis Services"**

- Select the **"Data"** tab at the top
- Select **"Get Data" > "From Database"**
- Select **"From Analysis Services"**

Next, the **"Data Connection Wizard"** will open. You will use the wizard to connect to the

2 CONNECT

- Type **"cubes.uw.edu"** into the **"Server name"** field

Connect to Database Server

Enter the information required to connect to the database server.

1. Server name:

ENTER NETID/PASSWORD

3 LOG IN

- Select **"Use the following User Name and Password"**
- Type **"netid\[yourNetID]"** and **password**
- Click **"Next"**

2. Log on credentials

- Use Windows Authentication
- Use the following User Name and Password

User Name:

Password:

Next, choose the database connection and cube that you want to view.

Example: I want to view "ResearchAdminData" cube.

4 SELECT

- From the database dropdown, select **"ResearchAdminData"**
- From the list, select **"ResearchAdminData"**
- Select **"Next"**

Connect to a specific cube or table:

Name	Description	Modified
RAD		7/11/2018
ResearchAdminData		7/11/2018

That's it! Now select **"Finish"** and you are connected to the cube!
